COURSE INFORMATION: *Classes are subject to change/cancellation without notice*
 This course addresses regulatory pipeline safety as well as damage & injury prevention subject matter.

Through useful presentations and supportive videos students will be provided specific pipeline safety & operations information to increase both their basic knowledge of the pipeline industry and how to increase responder safety when responding to pipeline incidents in their jurisdictions.

The instructor will offer general emergency response guidelines & basic considerations will be discussed from both a pipeline operations AND emergency responder point of view.

Topics:

- Basic types and categories of pipeline systems
- Primary federal agencies that regulate pipeline operations
- Primary state agencies that regulate pipeline operations
- Primary federal and state agencies that investigate pipeline accidents
- Primary industry and trade associations that develop pipeline standards
- Primary causes of pipeline incidents
- Industry and governmental programs to prevent pipeline incidents
- Using the Emergency Response Guidebook (ERG)
- Using the Material Safety Data Sheets (MSDS)

Facilitated By: Texas A&M Engineering Extension Service (TEEX), Emergency Services Training Institute (ESTI).

Facilities Furnished By: Labelle-Fannett Fire & EMS, Station 1, 12880 FM 365, Beaumont, TX 77705
