

Radiation Monitoring and Detection Training

The Port Arthur Fire Department will be hosting two (2) days of Radiation Monitoring and Detection Training on October 18 & 19, 2012. These are two (2), eight (8) hour classes. The following topics will be discussed and practiced:

- Health & Safety Considerations
- Radiological Monitoring & Detection Equipment Use
- Radiation Monitoring and Detection Strategies and Tactics
- Area Survey Techniques
- Decontamination Procedures
- Hot Source Survey Practicum

Instruction will be facilitated by Technical Resources Group, Inc. They are a Department of Energy (DOE) contractor that provides this type of training nationwide.

The primary audience for this training includes Hazardous Materials Response Team personnel, Hazardous Materials Technicians, and Radiation Control Officers. Training will run 8 am – 5 pm daily at the Port Arthur Civic Center. Lunch will not be provided. There is no cost for this training. Both days of training are identical, personnel only need to attend one day of training to receive all blocks of instruction.

If your agency or team possess any radiation monitoring and detection equipment, including: survey meters, dosimeters, or isotope identification devices, bring them to the training. You will have an opportunity to use them during practical exercise evolutions.
